Subject index

Active sites,
nucleation on active sites. Part V. The theory of nucleation rate dispersion (Deutscher, Fletcher) 1
Adsorbate,
comparison of four methods of integration in the context of their application in calculations of the surface activity of an organic compound and the excess electrochemical Gibbs energy of mixing in the adsorbate state (Karolczak) 73
Alcohol dehydrogenase,
electrical activity controlling system for a mediator-coexisting alcohol dehydrogenase–NAD conductive membrane (Yabuki et al.) 179
Alkaline solutions,
effects of concentration and temperature of alkaline solutions on the electrochemical stability of a gas diffusion electrode (Sato et al.) 151
Hydride formation of Ni-containing glassy-metal electrodes during the H_2 evolution reaction in alkaline solutions (Vračar, Conway) 253
Aluminium,
processes on aluminium on the negative side of the open-circuit potential (Radošević et al.) 105
Aminosilanes,
why is covalent immobilization of quinones possible at electrodes via aminosilanes? (Solov'ev, Katz) 337
Azoles,
application of azoles as neutral carriers in liquid membrane ion-selective pH electrodes (Chojnacki, Biernat) 159

Biphenyl,
an in-situ multiple internal reflection Fourier transform infrared spectroscopic (MIRF-TIRS) investigation of the growth mechanism of polyphenylene during electrooxidation of biphenyl in methylene dichloride (Pham et al.) 327
2,2′-Bipyridine,
transfer behavior of cobaltous ion across the water/nitrobenzene interface facilitated by 2,2′-bipyridine (Liu, Wang) 305

Chemisorbed anions,
electrocatalytic mediation of oxidation of H_2 at gold by chemisorbed states of anions (Angerstein-Kozlowska et al.) 233
Chromium amalgam,
properties and stability of supersaturated chromium amalgam (Ochodzki, Wrona) 225
Chromium ion,
electrode processes of Cr(II) in non-complexing and complexing media (Wrona) 213
Cobaltous ion,
transfer behavior of cobaltous ion across the water/nitrobenzene interface facilitated by 2,2′-bipyridine (Liu, Wang) 305
Cobalt porphyrin,
electrochemistry of conducting polypyrrole films containing cobalt porphyrin (Armengaud et al.) 197
Complexing media,
electrode processes of Cr(II) in non-complexing and complexing media (Wrona) 213
Covalent immobilization,
why is covalent immobilization of quinones possible at electrodes via aminosilanes? (Solov'ev, Katz) 337

Deuterium,
experimental investigation of thermal and radiation effects induced by deuterium discharge at the palladium electrode (Chemla et al.) 93

Electron spin resonance spectroscopy,
a wall–jet electrode for in-situ electrochemical ESR (Compton et al.) 83

Electron transfer,
Padé approach to potential transients. Part 1. Electron transfer without and with coupling to first-order homogeneous reactions at planar electrodes (Kant, Rangarajan) 19

First-order homogeneous reactions,
Padé approach to potential transients. Part 1. Electron transfer without and with coupling to first-order homogeneous reactions at planar electrodes (Kant, Rangarajan) 19

Gas diffusion electrode,
effects of concentration and temperature of alkaline solutions on the electrochemical stability of a gas diffusion electrode (Sato et al.) 151

Gibbs energy of mixing,
comparison of four methods of integration in the context of their application in calculations of the surface activity of an organic compound and the excess electrochemical Gibbs energy of mixing in the adsorbate state (Karolczak) 73

Glassy-metal electrodes,
hydride formation of Ni-containing glassy-metal electrodes during the H_2 evolution reaction in alkaline solutions (Vračar, Conway) 253

Gold,
electrocatalytic mediation of oxidation of H_2 at gold by chemisorbed states of anions (Angerstein-Kozlowska et al.) 233

Hydrated films,
electrochromic NiO_xH_y hydrated films: cyclic voltammetry and ac impedance spectroscopy in aqueous electrolyte (Gorenstein et al.) 277

Hydride,
hydride formation of Ni-containing glassy-metal electrodes during the H_2 evolution reaction in alkaline solutions (Vračar, Conway) 253

Hydrogen,
electrocatalytic mediation of oxidation of H_2 at gold by chemisorbed states of anions (Angerstein-Kozlowska et al.) 233
Hydride formation of Ni-containing glassy-metal electrodes during the H_2 evolution reaction in alkaline solutions (Vračar, Conway) 253
Measurement of hydrogen uptake by palladium using a quartz crystal microbalance (Cheek, O'Grady) 341

Image potential,
an investigation of the image potential at the semiconductor/electrolyte interface employing nonlocal electrostatics (Smith, Koval) 43

Indium doped iron oxide,
photoelectrochemical properties of indium doped iron oxide (Schumacher et al.) 121

Integration,
comparison of four methods of integration in the context of their application in calculations of the surface activity of an organic compound and the excess electrochemical Gibbs energy of mixing in the adsorbate state (Karolczak) 73

Ion-selective electrodes,
an XPS investigation of silver chloride coated ion-selective electrodes (Strydom et al.) 165

Ion-selective pH electrodes,
application of azoles as neutral carriers in liquid membrane ion-selective pH electrodes (Chojnacki, Biernat) 159

Iridium chloride,
microstructure and electrical properties of IrO_2 prepared by thermal decomposition of $IrCl_3 \cdot x\ H_2O$. Role played by the conditions of thermal treatment (Lodi et al.) 139

Iridium oxide,
microstructure and electrical properties of IrO_2 prepared by thermal decomposition of $IrCl_3 \cdot x\ H_2O$. Role played by the conditions of thermal treatment (Lodi et al.) 139

Iron oxide,
photoelectrochemical properties of indium doped iron oxide (Schumacher et al.) 121

Liquid membrane ion-selective pH electrodes,
application of azoles as neutral carriers in liquid membrane ion-selective pH electrodes (Chojnacki, Biernat) 159

Lithium batteries,
vanadium pentoxide xerogel as rechargeable cathodic material for lithium batteries (Baddour et al.) 359

Mediator,
electrical activity controlling system for a mediator-coexisting alcohol dehydrogenase–NAD conductive membrane (Yabuki et al.) 179

Methanol,
analysis of time-dependent kinetics for the oxidation of methanol on a platinum electrode and reaction mechanism (Inada et al.) 315

Methylene dichloride,
an in-situ multiple internal reflection Fourier transform infrared spectroscopic (MIRF-TIRS) investigation of the growth mechanism of polyphenylene during electrooxidation of biphenyl in methylene dichloride (Pham et al.) 327
Molybdophosphate anions,
the phase transfer mechanism of 12- and 18-molybdophosphate anions (Keggin- and Dawson-type structures) across the water/nitrobenzene interface (Liu, Wang) 291

Neutral carriers,
application of azoles as neutral carriers in liquid membrane ion-selective pH electrodes (Chojnacki, Biernat) 159
Nickel,
hydride formation of Ni-containing glassy-metal electrodes during the H_2 evolution reaction in alkaline solutions (Vračar, Conway) 253
Nickel oxide hydrated films,
electrochromic NiO_xH_y hydrated films: cyclic voltammetry and ac impedance spectroscopy in aqueous electrolyte (Gorenstein et al.) 277
Nicotinamide-adenine dinucleotide,
electrical activity controlling system for a mediator-coexisting alcohol dehydrogenase–NAD conductive membrane (Yabuki et al.) 179
Non-complexing media,
electrode processes of Cr(II) in non-complexing and complexing media (Wrona) 213
Nonlocal electrostatics,
an investigation of the image potential at the semicondcutor/electrolyte interface employing nonlocal electrostatics (Smith, Koval) 43
Nucleation,
nucleation on active sites. Part V. The theory of nucleation rate dispersion (Deutscher, Fletcher) 1

Open-circuit potential,
processes on aluminium on the negative side of the open-circuit potential (Radošević et al.) 105
Organic compound,
comparison of four methods of integration in the context of their application in calculations of the surface activity of an organic compound and the excess electrochemical Gibbs energy of mixing in the adsorbate state (Karolczak) 73

Padé approach,
Padé approach to potential transients. Part 1. Electron transfer without and with coupling to first-order homogeneous reactions at planar electrodes (Kant, Rangarajan) 19
Palladium,
measurement of hydrogen uptake by palladium using a quartz crystal microbalance (Cheek, O'Grady) 341
Palladium electrode,
experimental investigation of thermal and radiation effects induced by deuterium discharge at the palladium electrode (Chemla et al.) 93
Phase transfer,
the phase transfer mechanism of 12- and 18-molybdophosphate anions (Keggin- and Dawson-type structures) across the water/nitrobenzene interface (Liu, Wang) 291
Photoelectrochemistry,
photoelectrochemical properties of indium doped iron oxide (Schumacher et al.) 121
Planar electrodes,
Padé approach to potential transients. Part 1. Electron transfer without and with coupling to first-order homogeneous reactions at planar electrodes (Kant, Rangarajan) 19
Platinum electrode,
analysis of time-dependent kinetics for the oxidation of methanol on a platinum electrode and reaction mechanism (Inada et al.) 315
Polyaniline film electrodes,
quantitative and in-situ measurements of proton transport at polyaniline film electrodes (Shimazu et al.) 347
Poly(fluorinated 3-alkyl thiophene),
Poly(fluorinated 3-alkyl thiophene) (Büchner et al.) 355
Polyphenylene,
an in-situ multiple internal reflection Fourier transform infrared spectroscopic (MIRF-TIRS) investigation of the growth mechanism of polyphenylene during electrooxidation of biphenyl in methylene dichloride (Pham et al.) 327
Polypyrrole films,
electrochemistry of conducting polypyrrole films containing cobalt porphyrin (Armengaud et al.) 197

Potential transients,
Padé approach to potential transients. Part 1. Electron transfer without and with coupling to first-order homogeneous reactions at planar electrodes (Kant, Rangarajan) 19
Proton transport,
quantitative and in-situ measurements of proton transport at polyaniline film electrodes (Shimazu et al.) 347

Quartz crystal microbalance,
measurement of hydrogen uptake by palladium using a quartz crystal microbalance (Cheek, O'Grady) 341
Quinones,
electrochemical properties of some naturally occurring quinones (Petrova et al.) 189
Why is covalent immobilization of quinones possible at electrodes via aminosilanes? (Solov'ev, Katz) 337

Radiation effects,
experimental investigation of thermal and radiation effects induced by deuterium discharge at the palladium electrode (Chemla et al.) 93

Semiconductor/electrolyte interface,
an investigation of the image potential at the semiconductor/electrolyte interface employing nonlocal electrostatics (Smith, Koval) 43
Silver chloride coated ion-selective electrodes,
an XPS investigation of silver chloride coated ion-selective electrodes (Strydom et al.) 165
Surface activity,
comparison of four methods of integration in the context of their application in calculations of the surface activity of an organic compound and the excess electrochemical Gibbs energy of mixing in the adsorbate state (Karolczak) 73

Thermal effects,
experimental investigation of thermal and radiation effects induced by deuterium discharge at the palladium electrode (Chemla et al.) 93
Thermal treatment,
microstructure and electrical properties of IrO_2 prepared by thermal decomposition of $IrCl_3 \cdot x\ H_2O$. Role played by the conditions of thermal treatment (Lodi et al.) 139
Time-dependent kinetics,
analysis of time-dependent kinetics for the oxidation of methanol on a platinum electrode and reaction mechanism (Inada et al.) 315

Vanadium pentoxide xerogel,
vanadium pentoxide xerogel as rechargeable cathodic material for lithium batteries (Baddour et al.) 359

Wall–jet electrode,
a wall–jet electrode for in-situ electrochemical ESR (Compton et al.) 83
Water/nitrobenzene interface,
phase transfer mechanism of 12- and 18-molybdophosphate anions (Keggin- and Dawson-type structures) across the water/nitrobenzene interface (Liu, Wang) 291
Transfer behavior of cobaltous ion across the water/nitrobenzene interface facilitated by 2,2′-bipyridine (Liu, Wang) 305

Xerogel,
vanadium pentoxide xerogel as rechargeable cathodic material for lithium batteries (Baddour et al.) 359
